

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. A word of explanation may be in place with reference to the contents of this Biennial Report. It has been customary in the past to prepare reading matter that would show the progress that has been made in the different departments of education. A recent law has, however, limited the number of pages that may be in the Biennial Report of the State Superintendent of Public Instruction. It has been deemed best to eliminate discussion rather than statistics. This fact will account for the absence of such discussions as have heretofore occupied a considerable portion of the Biennial Report.

Madison, Wisconsin, June 30, 1914.

To Honorable O. P. Cary,  
*State Superintendent of Public Instruction.*

The board of trustees of the Teachers' Insurance and Retirement Fund herewith submits its report for the three years ending June 30, 1914. (It has been thought best to include the 1911-'12 report as no previous report has been published.)

The board of trustees wishes to express its gratitude to the teachers, clerks, treasurers and superintendents for their hearty cooperation.

An effort is being made to simplify reports in every way possible consistent with the proper administration of the law.

As the law is becoming better understood there is coming to be a decided change in the attitude of teachers (especially young teachers) toward the compulsory feature.

Many for whom the law was elective and who did not elect to come under its provisions have expressed regret that they did not make application before September 1, 1912, the time provided for in the law.

Many new teachers for whom the law was compulsory, not understanding the law fully and fearing they might not be included, have made application.

The statistics for the first year, fiscal year ending June 30, 1912, are not as complete as we could wish, as the law was new and the reports in many cases quite inaccurate.
